

Video Alarm Tablet

A modern, digital interface which allows authorized users to effortlessly arm and disarm video alarms, adding a crucial touchpoint to your security protocol.

Video Alarm Tablet benefits

Arm and disarm the alarm system using a PIN, and remotely manage PINs through the Solink platform for flexible, temporary disarmament.

Gain insights into security events with a comprehensive audit trail with video evidence.

Provide timely warnings with auto alerts to deter unauthorized individuals.

Enhance your security solution by having an additional camera incorporated in the Video Alarm Tablet which can be used for regular video playback and video alarms.

Maintain continuous functionality with LTE backup to arm/disarm alarm and audit event recording capabilities.

Enable two-way communication with the intercom system.*
